

## SolarVu CO<sub>2</sub> & Carbon Tax Calculator

No matter what legislation results from the [Paris Climate Change conference](#), setting CO<sub>2</sub> limits or new carbon taxes, your SolarVu energy portal provides you the necessary detailed reports to comply. Switch from kWh and revenue reporting to CO<sub>2</sub> SAVED in the [LIVE screen](#) to get detailed carbon tax saved or CO<sub>2</sub> offset from the renewable energy your system generated using solar instead of fossil fuel. Print detailed reports or download data for any time period. SolarVu saves revenue grade energy values for the life time of the system and accurately converts kWh to carbon equivalents - standard with every SolarVu portal.

SolarVu LIVE screen shows CO<sub>2</sub> offset and carbon tax saved for any time period

### FEATURES

- Output & savings reports
- Lifetime data storage & download
- SMART Enterprise - manage portfolio
- Consistent interface for multi vendors
- Updates to meet future requirements

Talk to Cachelan engineers about your requirements at the Solar Canada show
